I. STATEMENT OF PURPOSE

This Cash Management Plan (the "Plan") is prepared pursuant to the provisions of N.J.S.A. 40A: 5-14 in order to set forth the basis for the deposits ("Deposits") and investment ("Permitted Investments") of certain public funds of the Township of Livingston, pending the use of such funds for the intended purposes. The Plan is intended to assure that all public funds identified herein are deposited in interest or dividend bearing accounts, except for those funds restricted by Federal or State regulations, or otherwise invested in Permitted Investments hereinafter referred to. The intent of the Plan is to provide that the decisions made with regard to the Deposits and the Permitted Investments will be done to insure the safety, the liquidity (regarding its availability for the intended purposes), and the maximum investment return within such limits. The Plan is intended to insure that any Deposit or Permitted Investment matures within the time that approximates the prospective need for the funds deposited or invested so that there is not a risk to the market value of such Deposits or Permitted Investments.

II. CASH MANAGEMENT POLICY

Objectives:

The priority of investing policies shall be, in order of descending importance, security, liquidity, and yield.

(1) Security: The safety of principal is the foremost objective of the cash management plan. Investments shall be undertaken in a manner that seeks to ensure the preservation of capital in the overall portfolio. The objective is to mitigate credit risk and interest rate risk.

(2) Credit Risk: Credit risk is the risk of loss due to failure of the security issuer or backer. Credit risk may be mitigated by:

   (a) Limiting investment to the safest types of securities.

   (b) Pre-qualifying the financial institutions, broker/dealers, intermediaries, and advisors with which an entity will do business.

   (c) Diversifying the investment portfolio so that potential losses on individual securities will be minimized.

(3) Interest Rate Risk: Interest rate risk is the risk that the market value of the securities in the Portfolio will fall due to changes in general interest rates. Interest rate risk may be mitigated by:

   (a) Structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations, thereby avoiding the need to sell securities on the
open market prior to maturity, and

(b) By investing operating funds primarily in shorter-term securities.

(4) Liquidity: The investment portfolio must remain sufficiently liquid structuring the portfolio so that securities mature concurrent with cash needs to meet anticipated demands (static liquidity). Furthermore, since all possible cash demands cannot be anticipated, the portfolio should consist largely of securities with active secondary or resale markets (dynamic liquidity).

(5) Yield: The investment portfolio must be designed with the objective of attaining a market rate of return throughout budgetary and economic cycles, taking into account the investment risk constraints and liquidity needs. Return on investments of least importance compared to the safety and liquidity objective described above. The core of investments in limited to relatively low risk securities in anticipation of earning a fair return relative to the risk being assumed. The Chief Financial Officer shall carefully evaluate any investment offering above market yields. Securities shall not be sold prior to maturity with the following exceptions:

(a) A declining credit security could be sold early to minimize the loss of principal.

(b) A security swap would improve the quality, yield, or target duration in the portfolio.

(c) Liquidity needs of the local unit require that the security be sold.

(6) Prudence

The standard of prudence to be used by investment officials shall be the "prudent person" standard and shall be applied in the context of managing the overall portfolio in accordance with the State Law and this policy. The Chief Financial Officer, acting in accordance with the written procedures and this cash management plan and exercising due diligence shall be relieved of personal responsibility of an individual security's credit risk or market price changes, provided that the liquidity of the sale of securities are carried out in accordance with the terms of the cash management plan and policy.

(7) Ethics and Conflicts of Interest

The designated officials involved in the investment process shall not have personal business activity that could conflict with the proper execution and management of the investment program, or that could impair their ability to make impartial decisions. Actions of individuals involved in administering the cash management plan shall be governed by the Local Government Ethics Law. They shall disclose any personal financial/investment positions that could be related to the performance of the investment portfolio. The designated officials shall refrain from undertaking personal investment transactions with the same individual with whom business in conducted on behalf of the Township of Livingston.

(8) Delegation of Authority
Authority to manage the cash management plan is granted to the Chief Financial Officer pursuant to N.J.S.A. 40A:5-14. Responsibility for the operation of the cash management plan is hereby delegated to the Chief Financial Officer. No person may engage in a cash or investment transaction except as provided under the terms of the policy and the written procedures established by the Chief Financial Officer. The Chief Financial Officer shall be responsible for all transactions undertaken and shall establish a system of controls to regulate the activities of subordinate officials.
